

**CONTENTS VOL. 10, NO. 1, 1991**

**ADHESION MOLECULES AND MALIGNANCY**

Editorial	
Erkki Ruoslahti	1
Structure, function and biological properties of integrin $\alpha_v\beta_3$ on human melanoma cells	
D.A. Cheresh	3
Cell adhesion molecules of the immunoglobulin supergene family and their role in malignant transformation and progression to metastatic disease	
J.P. Johnson	11
Adhesion mechanisms in lymphatic metastasis	
P. Brodt	23
Adhesion molecules in lymphoma metastasis	
E. Roos	33
Integrin expression in malignant melanoma	
R.H. Kramer, M. Vu, Y.-F. Cheng and D.M. Ramos	49
PMN adhesion and extravasation as a paradigm for tumor cell dissemination	
C.W. Smith and D.C. Anderson	61
Erratum	
Orthotopic implantation is essential for the selection, growth and metastasis of human renal cell cancer in nude mice	
I.J. Fidler, S. Naito and S. Pathak 9: 149-165, 1990	79
Instructions to authors	81

## CONTENTS VOL. 10, NO. 2, 1991

## NEW DEVELOPMENTS IN MALIGNANT MELANOMA

*Overview*

Human cutaneous malignant melanoma as a model for cancer W.H. Clark, Jr.	83
Growth factors in melanoma U. Rodeck and M. Herlyn	89
Cytogenetics of human malignant melanoma J.M. Trent	103
Cell adhesion receptor expression during melanoma progression and metastasis I.R. Hart, M. Birch and J.F. Marshall	115
Growth factors and tyrosine protein kinases in normal and malignant melanocytes R. Halaban	124
Antigens of melanocytes and melanoma S.A. Lynch, B.N. Bouchard, S. Vijayasradhi, H. Yuasa and A.N. Houghton	141
Human autologous tumor-specific T cells in malignant melanoma C.D. Platsoucas	151
Photoimmunology of experimental melanoma C.K. Donawho and M.L. Kripke	177
Instructions to authors	189

## CONTENTS VOL. 10, NO. 3, 1991

NEW DEVELOPMENTS IN *IN VIVO* MODELS OF NEOPLASIA*Overview*New developments in *in vivo* models of neoplasia

I.J. Fidler 191

## Potential of the scid mouse as a host for human tumors

B.M. Mueller and R.A. Reisfeld 193

## Importance of orthotopic transplantation procedures in assessing the effects of transfected genes on human tumor growth and metastasis

R.S. Kerbel, I. Cornil and D. Theodorescu 201

## Expression of activated oncogenes in the murine mammary gland: transgenic models for human breast cancer

W.J. Muller 217

## Orthotopic implantation of human colon carcinomas into nude mice provides a valuable model for the biology and therapy of metastasis

I.J. Fidler 229

## Basement membrane and the SIKVAV laminin-derived peptide promote tumor growth and metastases

T.M. Sweeney, M.C. Kibbey, M. Zain, R. Fridman and H.K. Kleinman 245

## Tumor models in drug development

D.P. Griswold, Jr. and S.D. Harrison, Jr. 255

## Fibroblasts are critical determinants in prostatic cancer growth and dissemination

L.W.K. Chung 263

## Announcement 275

## Instructions to authors 277

## CONTENTS VOL. 10, NO. 4, 1991

## BIOLOGY AND GENETICS OF NERVOUS SYSTEM TUMORS

*Overview*

Biology and genetics of nervous system tumors P. Frost	279
Genes associated with tumor suppression and growth control in the human nervous system B.R. Seizinger	281
Genetic alterations in glioma and medulloblastoma B.K.A. Rasheed and S.H. Bigner	289
Neurofibromatosis type 1 (NF1) gene: Implication in neuroectodermal differentiation and genesis of brain tumor T. Nishi and H. Saya	301
Biology of pediatric peripheral neuroectodermal tumors C.J. Thiele	311
Biology of tumors of the peripheral nervous system G.W. Brodeur and J.F. Moley	321
The role of chemotherapy in the treatment of patients with brain metastases from solid tumors J.C. Buckner	335
Volume contents	343
Instructions for authors	347
